Pachmarhi hill station was discovered by Captain J. Forsyth in 1861, who was looking for a cool and serene picturesque landscape for summer get-away for Britishers. In the pursuit he followed the route via Dehlia to reach at Priya Darshani Point on Pachmarhi plateau and his memoire back then in 1861 is described in his book "Highlands of Central India". Multiple crossing of river Denwa, view of Pachmarhi hills, large diversity of flora & fauna etc make this place a most sought after trek of central India.

Jhanjh Eco Jungle Camp (Dhamokhar Buffer)  
Place where water dances on nature's tune

“Jhanjh is part of the buffer zone of Bandhavgarh Tiger Reserve, which is having the highest density of Tigers in the world, therefore animal sighting in Jhanjh buffer is also quite high. Apart from Tiger, Jhanjh offers other wild animals, dense Saal forest and a perennial waterfall. In fact, the name Jhanjh is derived from the mystique sound generated by the fall”
